

27 NOV 1978

MEMORANDUM FOR THE RECORD

SUBJECT: Project SAFE Meeting

1. A meeting was held on 21 November 1978 to discuss the dividing line between Phase I and Phase II of the SAFE construction project. Attendees were:

STATINTL

- C/ADS/LSD
- C/BS/HEB/RECD/OL
- SPS/ODP

2. It was decided that SAFE Phase I would encompass approximately 8700 square feet and SAFE Phase II encompass 7400 square feet. The dividing line would extend from the ground floor perimeter wall west along column line 40, until it intersects column line X. It then proceeds 35 feet along column line X to a distance five feet from the center line of column 38X. It then proceeds 20 feet west until it intersects the existing GB Corridor wall.

3. The SAFE Architect-Engineering (A-E) firm will be advised to alter their design to provide for Phase I and Phase II as described above. Per the information provided by [REDACTED] the Central Intelligence Agency Safety Branch will be advised that a dry pipe preaction system, rather than a wet pipe sprinkler system, is preferred by the Special Projects Staff. Their concurrence will be solicited.
